## WORK EXPERIENCE

### Quality Assurance Developer, Stefanini Brasil - JUN/2021 - APR/2022

*Stefanini is an IT outsourcing company, their core is hiring IT professionals and providing valuable skilled workers to their customers in all areas of technologies ...*

- **Development and maintenance:** automated tests for the management of financial debts of customers. During this time my team and I created and fixed around 500 tests which increases the quality coverage from 20% to nearly 70%.
- **Reverse engineering and mapping of business rules:** to draw the new test flow and test parameters. After each cycle, we created documentation to support all development teams and further training sessions.
- **Integration test development:** to verify the data integrity before and after running all the test suits, and development of mock data to support all kinds of testing.

**Technologies used:** SISBB and KDZ test, COBOL, Proprietary Version Control System, SQL scripts, JIRA ticket Management tool, Scrum & Kanban.

### Software Developer, Stefanini Brasil - DEZ/2019 - JUN/2021

*Stefanini is an IT outsourcing company, their core is hiring IT professionals and providing valuable skilled workers to their customers in all areas of technologies ...*

- **Development of procedures:** using Natural CICS/Batch to read the environment and execute all database migration scripts. During a whole year, my team and I wrote more the 600 routines to execute the data migration from the ADABAS database to the DB2 database. After the first milestone of the project was executed we migrated more than 600 tables and their data.
- **Development of automatized tests:** and execution of manual testing to evaluate the results of each executed migration script.
- **Support and participate in the training sessions:** to promote the success rate of onboarding to the new team members.

**Technologies used:** SISBB and KDZ, Natural CICS / Batch, JCL, COBOL, SVN, SQL scripts, Adabas and DB2 relational databases, automatized tests, JIRA ticket Management tool, Agileusing Scrum & Kanban.

**Junior Software Developer, Intech Soluções em TI - JAN/2019 - NOV/2021 - Brazil**

*Intech is a private that offers systems and tools for the management of the employee's retirement pension.*

- **Development and maintenance:** of common features to execute CRUD operation and basic analytics reports.
- **Development of DDL and DML SQL scripts:** to modify and evolve the system database.
- **Development of documentation:** and training tutorials for new licensed users.
- **Provide support and assistance:** to new users or customers of the Maker tool.
- **Technologies used:** Maker low-code tool with Java and Javascript, HTML, CSS, Modeling diagrams, and business BPM workflow, diagraming dynamic GUI, SQL SERVER Database, Kanban, Remote access, and software deployment.
